## Washington dc natural gas prices

Member Resources Increase energy efficiency Benefits around the home Moves our economy Gasoline prices increased \$3.588 per gallon in the Washington-Arlington-Alexandria area in February 2022, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Alexandra Hall Bovee noted that area gasoline prices increased 44.6 percent from last February when they averaged \$2.482 per gallon. Washington area households paid an average of 13.6 cents per kilowatt hour (kWh) of electricity in February 2022, 7.9 percent higher than the 12.6 cents in February 2021. The average price of utility (piped) gas at \$1.509 per therm in February 2022 was up 24.5 percent from \$1.212 per therm a year earlier. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.) At \$3.588 per gallon, Washington area consumers paid 2.4 percent less than the national average of \$3.675 for a gallon of gasoline in February 2022. From 2018 to 2021, prices for a gallon of gasoline in Washington were close to the U.S. average in February, differing by 3.0 percent or less. (See chart 1 and table 1.) The 13.6 cents per kWh for electricity in Washington was 8.0 percent below the national average. From 2018 to 2020, electricity prices for the Washington area consumers for utility (piped) gas, commonly referred to as natural gas, was \$1.509 per therm in February 2022, 6.8 percent above the national average of \$1.413 per therm. Last February, the price for utility (piped) gas in Washington was 7.8 percent higher than the national average. From 2018 to 2020, the price for utility (piped) gas in the Washington area ranged from 12.4 percent to 21.9 percent higher than the national average in February. (See chart 3.) The Washington-Arlington-Alexandria, DC-VA-MA-WV, Core Based Statistical Area includes the District of Columbia; the counties of Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park and the counties of Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford, and Warren in Virginia; and the county of Jefferson in West Virginia. The Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, the 3 population size classes, 10 region/size-class cross-classifications, and the 14 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price across all grades. All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas. Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: 202-691-5200; Telecommunications Relay Service: 7-1-1. Table 1. In Washington, D.C., this means your utility — which many customers refer to as power and gas companies — owns the power lines and gas pipelines which deliver energy to you to serve your home. What is an energy supplier? Energy suppliers, gives you more control over your budget by providing you with more home energy options (for example, choosing a renewable electric plan). Washington, D.C. electricity providers and gas suppliers can also offer fixed-rate plans, so you know what energy rate you'll be paying every month, for the length of your agreement. As your Washington, D.C. gas and electricity provider, we don't deliver electricity and natural gas to your home (that's the utility), but we do provide the commodity, and set your rate and contract term. A Washington, D.C. energy supplier provides you with customized plans, competitive natural gas and electricity rates, and exceptional customer service! No matter where they live, most people want to save on utilities. Luckily, some states have now deregulated natural gas so that you can shop around for natural gas prices, you have options. Here's how to find them. Where Is Natural Gas Deregulated in your area. That means your state doesn't have laws in place that force you to use one specific provider based on where you live. Indiana, Texas, Georgia, California, Connecticut, Maryland, Michigan, Ohio, Rhode Island, Pennsylvania, New Jersey, New York, New Hampshire, Maine, Massachusetts and Illinois are all states that offer some sort of gas-related deregulation, according to the website Save On Energy. Some are for commercial buildings only, and others still have some rules in place. Visit the website to learn more about your state. Find a Pricing ChartOnce you know that you have options when it comes to choosing a natural gas provider, you can look at the rates to determine which company is the most appealing. There are multiple places to find the rates, ranging from third-party sites to the gas companies themselves. You can visit the Georgia Public Service Commission website and view the Gas Marketer Pricing chart. It provides you with current and previous monthly rates for the state. Rates Change OftenKeep in mind that natural gas rates change regularly, so what you see in January probably isn't going to be the same in February. Supply and demand dictate what rates are during any given month, according to the United States Energy Information Administration. For example, on the demand side, prices may be higher during the winter when more people are using their gas heating systems. As for supply, when production is down, prices tend to go up and vice versa. Other factors that may play a role in natural gas prices include weather throughout the country, the economy, petroleum prices and imports and exports. How to Choose a MarketerOnce you've viewed prices, if you're still not sure which company (they're sometimes called providers or marketers) you want to choose, take some other things into consideration. These factors might include the customer service you receive when you contact their call centers, the hours an operator is available to handle your issue, how knowledgeable employees are when you inquire about new service, the marketer's reputation and how the company handles customer disputes. Ways to Lower Your Current Natural Gas BillIf you're still dissatisfied with the price you pay for natural gas, there are some things you can do to safely reduce your bill. One easy way is to run your heat at a lower temperature or, if possible, not at all. Turn it off when you aren't home. You can also try other ways to warm yourself when it's cool out, like building a fire in your fireplace or wearing more layers. Open your curtains and blinds, and allow natural sunlight to shine in. Make sure your home is insulated, especially around windows, and turn off any appliances that use gas when you aren't using them. MORE FROM QUESTIONSANSWERED.NET
